

Transfield Services High Road Wind Farm

Fact Sheet

Company Background

Transfield Services – home grown and growing

Transfield Services Limited is an Australian-based company that provides a wide range of world-class services to a diverse range of clients globally.

Transfield Services is listed on the Australian Stock Exchange (ASX) and is a top 100 Australian company. Transfield Services has a turnover of \$3.4 billion and has 28,000 employees across Australia, New Zealand, the United States, the United Arab Emirates, Qatar, South East Asia, India, Canada and South America.

Transfield Services Ltd was founded by Transfield Holdings, which began in 1956. Transfield Services was listed on the Australian Stock Exchange in 2001. Founding Chairman Dr Franco Belgiorno-Nettis (1915 – 2006) fostered a culture based on the highest standards of health and safety, commitment to integrity and motivating employees to strive for excellence. Transfield Services maintains those high standards that led to its conception and Transfield Holdings remains a major shareholder in the Company.

In June 2007, Transfield Services listed Transfield Services Infrastructure Fund (TSI Fund) on the ASX.

What Transfield Services are about

Transfield Services provide services to ensure power is on, gas and oil flowing, telecommunications connected, water and transport services are running and a wide range of facilities and workplaces are operating efficiently.

Transfield Services is an integrated service provider, delivering services across the full engineering value chain, including project feasibilities, project and capital works management, capital upgrades and rehabilitation, operations, maintenance and asset and facilities management services.

The Company provides services to a diverse range of industries, including mining and process, hydrocarbons, power, water, roads, rail and public transport, telecommunications and defence.

Power Services

Transfield Services is the leading provider of asset management, operations and maintenance services to the power generation, transmission and distribution industries. Transfield Services uses best-practice systems and processes, backed by technically-skilled people to deliver power services.

Power Generation

Transfield Services provides asset management, operations and maintenance services to Townsville and Collinsville Power Stations in Queensland and Kemerton Power Station in Western Australia on behalf of Transfield Services Infrastructure Fund.

As the preferred supplier to Transfield Services Infrastructure Fund, Transfield Services also contract manages the operators of TSI Fund's wind farms. Wind farms are located at Windy Hill in Queensland; Toora in Victoria; and Starfish Hill and Mt Millar, both in South Australia. Transfield Services acquired the High Road Wind Farm development in 2007. Transfield Services and TSI Fund are in an ideal position to make a major contribution to the Australian Government's renewable energy targets for 2020.

Working with Local Communities – Becoming a Better Neighbour

Transfield Services is committed to becoming a better neighbour. This means taking responsibility, working closely with local communities and operating sensibly in a changing climate. Transfield Services has an extensive geographic presence across Australia and is committed to being an active part of the community, especially in remote and regional areas. Transfield Services aims to build sustainable communities alongside sustainable business.
